Subject Index of Volume 200

Actinides
magnetic and electrical properties of (U, Th)T_2Sn_2 (T = Co, Ni, Cu) intermetallics, 115
molar enthalpies of formation of $BaCmO_3$ and $BaCfO_3$, 181
Activation
AB_2 and AB_5 metal hydride electrodes: a phenomenological model for the cycle life, 157
Activation energy
oxygen absorption kinetics in $YBa_2Cu_3O_x$, 33
Activity
thermodynamics of gold-rich Au–Zn alloys, 69
Afterglow mechanism
the afterglow mechanism of chromium-doped gadolinium gallium garnet, 17
Aluminium
the electrodeposition of Al–Mn ferromagnetic phase from molten salt electrolyte, 107
Anodic oxidation
anodic oxidation of titanium in phosphoric acid baths: phosphorus incorporation into the oxide, 191
Antiferromagnetism
on new rare earth gold aluminides LnAuAl, 75
Apatite phosphogypsum
development of the Polish wasteless technology of apatite phosphogypsum utilization with recovery of rare earths, 147

Barium
molar enthalpies of formation of $BaCmO_3$ and $BaCfO_3$, 181
Bismuth
on new Bi(III) materials with structures deriving from fluorite and pyrochlore types, 19

Cadmium telluride
the determination of the enthalpy of formation and the enthalpy increment of $Cd_{0.5}Te_{0.5}$ by Calvet calorimetry, 93
Calorimetry
high temperature calorimetric measurements on liquid Pd–La and Au–Gd alloys, 177
Calvet calorimetry
the determination of the enthalpy of formation and the enthalpy increment of $Cd_{0.5}Te_{0.5}$ by Calvet calorimetry, 93
Cerium
the afterglow mechanism of chromium-doped gadolinium gallium garnet, 17
Chalcogenides
synthesis and structure of ternary chalcogenide rare earth $AlnX_2$ with A≙alkali metal and X≙sulphides; selenides; tellurides, 205
Chloroaluminate
the electrodeposition of Al–Mn ferromagnetic phase from molten salt electrolyte, 107
Chromium
the afterglow mechanism of chromium-doped gadolinium gallium garnet, 17
Cobalt
synthesis and magnetic properties of $R_2Co_{17}N_x$ type interstitial compounds, L3
spin and valence state equilibria of cobalt and magnetic properties of $LaCoO_3$, 171
Coherency
a simplified quantitative approach to the isothermal hysteresis in metallic hydrides with coherent interphases, 87
Copper-oxovanadates
information on $RbBa_3Ca_4Cu_3V_7O_{28}$, 165
Crystal structure
structural chemistry and magnetism of dicyclopentadienidehalides of lanthanides.
Part 8: terbiumdicyclopentadienidebromide $[Tb(C_5H_5)_2Br]_2$, 195
Cycle-life
AB_2 and AB_5 metal hydride electrodes: a phenomenological model for the cycle life, 157

Decomposition
the decomposition of $NdPO_4$ during mechanical milling, 151
Deuterium
orthorhombic Mg_4IrD_5 with disordered deuterium distribution, 65
Differential scanning calorimetry
thermodynamics of the rhombohedral–cubic phase transition of ROF with R = Y, La, Pr, Nd, Sm–Er, 27

Electrical conductivity
phase diagram and electrical behavior of silicon-rich iridium silicide compounds, 99
Electrical properties
magnetic and electrical properties of (U, Th)T_2Sn_2 (T = Co, Ni, Cu) intermetallics, 115
electrical properties of silver vanadate electrochemical cells, 129
Electrical resistivity
magnetic, transport and Mössbauer effect study of UFeAl, 37
effect of magnetic interphase boundaries on the electrical resistivity in metallic metamagnets, 43
electronic properties of $CePd_xRh_{1-x}In$, 79
Electrodeposition
the electrodeposition of Al–Mn ferromagnetic phase from molten salt electrolyte, 107
Enthalpy
the determination of the enthalpy of formation and the enthalpy increment of $Cd_{0.5}Te_{0.5}$ by Calvet calorimetry, 93
Europium
crystal structure and properties of new ternary iridium phosphides, 135

Ferromagnetism
on new rare earth gold aluminides LnAuAl, 75
the electrodeposition of Al–Mn ferromagnetic phase from molten salt electrolyte, 107

Fluorite structure
on new Bi(III) materials with structures deriving from fluorite and pyrochlore types, 19
magnetic properties of pentavalent uranium ternary oxides with fluorite structure
Part II, 187

Galvanic cell
thermodynamics of gold-rich Au–Zn alloys, 69
Gold aluminides
on new rare earth gold aluminides LnAuAl, 75
Gold-zinc alloys
thermodynamics of gold-rich Au–Zn alloys, 69

Heat capacity
superconducting and magnetic properties of $Y_{1-x}U_xRh_4B_4$, 59
High pressure
a simplified quantitative approach to the isothermal hysteresis in metallic hydrides with coherent interphases, 87
Hydrogen absorption
hydrogen absorption characteristics of $Pd_{1-x}Li_x$ ($x = 0.055$ and 0.072) alloys and ordered Pd_7Li, 141
Hysteresis
a simplified quantitative approach to the isothermal hysteresis in metallic hydrides with coherent interphases, 87

Interphase boundaries
effect of magnetic interphase boundaries on the electrical resistivity in metallic metamagnets, 43
Iridium
phase diagram and electrical behavior of silicon-rich iridium silicide compounds, 99
Iridium phosphides
crystal structure and properties of new ternary iridium phosphides, 135

Lanthanides
molar enthalpies of formation of $BaCmO_3$ and $BaCfO_3$, 181
structural chemistry and magnetism of dicyclopentadienidehalides of lanthanides.
Part 8: terbiumdicyclopentadienidebromide $[Tb(C_5H_5)_2Br]_2$, 195
Luminescence
the afterglow mechanism of chromium-doped gadolinium gallium garnet, 17

Magnetic phase transitions
effect of magnetic interphase boundaries on the electrical resistivity in metallic metamagnets, 43
Magnetic properties
synthesis and magnetic properties of $R_2Co_{17}N_x$ type interstitial compounds, L3
magnetic, transport and Mössbauer effect study of UFeAl, 37
superconducting and magnetic properties of $Y_{1-x}U_xRh_4B_4$, 59
electronic properties of $CePd_xRh_{1-x}In$, 79
magnetic and electrical properties of (U, Th)T_2Sn_2 (T = Co, Ni, Cu) intermetallics, 115
spin and valence state equilibria of cobalt and magnetic properties of $LaCoO_3$, 171
magnetic properties of pentavalent uranium ternary oxides with fluorite structure
Part II, 187
Magnetic structures
magnetic structure of YMn_6Ge_6 and room temperature magnetic structure of $LuMn_6Sn_6$ obtained from neutron diffraction study, 51
Magnetic susceptibility
ferromagnetism in NiAs-type Co–Fe–Te, 123
structural chemistry and magnetism of dicyclopentadienidehalides of lanthanides.
Part 8: terbiumdicyclopentadienidebromide $[Tb(C_5H_5)_2Br]_2$, 195
Magnetization
ferromagnetism in NiAs-type Co–Fe–Te, 123
Manganese
the electrodeposition of Al–Mn ferromagnetic phase from molten salt electrolyte, 107
Mechanical milling
the decomposition of $NdPO_4$ during mechanical milling, 151
Metal hydride electrodes
AB_2 and AB_5 metal hydride electrodes: a phenomenological model for the cycle life, 157
Metal hydrides
a simplified quantitative approach to the isothermal hysteresis in metallic hydrides with coherent interphases, 87
Metallophthalocyanines
a simple, novel method for the preparation of metallophthalocyanines, L7
Metal oxides
molar enthalpies of formation of $BaCmO_3$ and $BaCfO_3$, 181
Mössbauer effect
magnetic, transport and Mössbauer effect study of UFeAl, 37

Neodymium phosphate
the decomposition of $NdPO_4$ during mechanical milling, 151
Neutron diffraction
magnetic structure of YMn_6Ge_6 and room temperature magnetic structure of $LuMn_6Sn_6$ obtained from neutron diffraction study, 51
NiAs-type structure
ferromagnetism in NiAs-type Co–Fe–Te, 123
Nickel arsenide
statistical model for phases with NiAs-type and closely related structures, 1
Nitrogenation
synthesis and magnetic properties of $R_2Co_{17}N_x$ type interstitial compounds, L3
Nuclear reaction analysis
anodic oxidation of titanium in phosphoric acid baths: Phosphorus incorporation into the oxide, 191

Oxygen absorption kinetics
oxygen absorption kinetics in $YBa_2Cu_3O_x$, 33

Phase diagrams
phase diagram and electrical behavior of silicon-rich iridium silicide compounds, 99
thermodynamics of gold-rich Au–Zn alloys, 69
Phosphorus
anodic oxidation of titanium in phosphoric acid baths: phosphorus incorporation into the oxide, 191

Potassium digermanate
synthesis and structure of a potassium nitridoditungstenate ($K_6W_2N_4O_3$), a potassium digermanate ($K_6Ge_2O_7$) and a rubidium digermanate ($Rb_6Ge_2O_7$), 211
Potassium nitridoditungstenate
synthesis and structure of a potassium nitridoditungstenate ($K_6W_2N_4O_3$), a potassium digermanate ($K_6Ge_2O_7$) and a rubidium digermanate ($Rb_6Ge_2O_7$), 211
Pressure synthesis
rhombohedral $LaCuO_3$: high-pressure synthesis of single crystals and structure refinement, L1

Rare earths
magnetic and electrical properties of (U, Th)T_2Sn_2 (T≡Co, Ni, Cu) intermetallics, 115
development of the Polish wasteless technology of apatite phosphogypsum utilization with recovery of rare earths, 147
Reaction
a simple, novel method for the preparation of metallophthalocyanines, L7
Resistivity
electrical properties of silver vanadate electrochemical cells, 129
Rubidium digermanate
synthesis and structure of a potassium nitridoditungstenate ($K_6W_2N_4O_3$), a potassium digermanate ($K_6Ge_2O_7$) and a rubidium digermanate ($Rb_6Ge_2O_7$), 211

Selenides
synthesis and structure of ternary chalcogenide rare earth $AlnX_2$ with A≙alkali metal and X≙sulphides; selenides; tellurides, 205
Silicon
phase diagram and electrical behavior of silicon-rich iridium silicide compounds, 99
Silver
electrical properties of silver vanadate electrochemical cells, 129
Single crystals
rhombohedral $LaCuO_3$: high-pressure synthesis of single crystals and structure refinement, L1
a simple, novel method for the preparation of metallophthalocyanines, L7
information on $RbBa_3Ca_4Cu_3V_7O_{28}$, 165
Specific heat
electronic properties of $CePd_xRh_{1-x}In$, 79
Spin
spin and valence state equilibria of cobalt and magnetic properties of $LaCoO_3$, 171
Spin-spin coupling
structural chemistry and magnetism of dicyclopentadienidehalides of lanthanides.
Part 8: terbiumdicyclopentadienidebromide $[Tb(C_5H_5)_2Br]_2$, 195
Stannides
magnetic and electrical properties of (U, Th)T_2Sn_2 (T≡Co, Ni, Cu) intermetallics, 115
Stresses
a simplified quantitative approach to the isothermal hysteresis in metallic hydrides with coherent interphases, 87
Strontium
molar enthalpies of formation of $BaCmO_3$ and $BaCfO_3$, 181
Structure determination
orthorhombic Mg_4IrD_5 with disordered deuterium distribution, 65
Structure refinement
rhombohedral $LaCuO_3$: high-pressure synthesis of single crystals and structure refinement, L1
Sulphides
synthesis and structure of ternary chalcogenide rare earth $AlnX_2$ with A≙alkali metal and X≙sulphides; selenides; tellurides, 205
Superconducting properties
superconducting and magnetic properties of $Y_{1-x}U_xRh_4B_4$, 59
Synthesis
orthorhombic Mg_4IrD_5 with disordered deuterium distribution, 65
synthesis and structure of a potassium nitridoditungstenate ($K_6W_2N_4O_3$), a potassium digermanate ($K_6Ge_2O_7$) and a rubidium digermanate ($Rb_6Ge_2O_7$), 211

Tellurides
synthesis and structure of ternary chalcogenide rare earth $AlnX_2$ with A≙alkali metal and X≙sulphides; selenides; tellurides, 205
Temperature dependence
high temperature calorimetric measurements on liquid Pd–La and Au–Gd alloys, 177
Terbium binuclear complex
structural chemistry and magnetism of dicyclopentadienidehalides of lanthanides
Part 8: terbiumdicyclopentadienidebromide $[Tb(C_5H_5)_2Br]_2$, 195
Thermodynamics
thermodynamics of the rhombohedral–cubic phase transition of ROF with R≡Y, La, Pr, Nd, Sm–Er, 27
hydrogen absorption characteristics of $Pd_{1-x}Li_x$ ($x=0.055$ and 0.072) alloys and ordered Pd_7Li, 141
spin and valence state equilibria of cobalt and magnetic properties of $LaCoO_3$, 171
Titanium
anodic oxidation of titanium in phosphoric acid baths: Phosphorus incorporation into the oxide, 191
Transition metals
statistical model for phases with NiAs-type and closely related structures, 1
Transportation
magnetic, transport and Mössbauer effect study of UFeAl, 37

Uranium
magnetic properties of pentavalent uranium ternary oxides with fluorite structure
Part II, 187

Valence
spin and valence state equilibria of cobalt and magnetic properties of $LaCoO_3$, 171
